SUMMARY

AI/ML enthusiast with strong foundations in Python, C++, and SDLC concepts. Experienced in building ML/DL solutions using TensorFlow, PyTorch, and LangChain, with a focus on problem-solving, collaboration, and delivering scalable, maintainable software.

EDUCATION

B.Tech in Computer Science and Engineering (2022 - 2026) Bhubaneswar, Odisha, India
Kalinga Institute of Industrial Technology
CGPA: 8.89

SKILLS

- **Programming:** Python, C++, Node.js, SQL
- **Core Competencies:** Software Development, Data Structures & Algorithms, SDLC, Problem Solving
- **ML/DL & Libraries:** TensorFlow, PyTorch, Scikit-learn, Keras, LangChain, LangGraph
- **Techniques:** Neural Networks, Regression, Classification, Transfer Learning, Attention Mechanisms
- **Tools & Practices:** Git, Agile Methodologies, Data Visualization (Matplotlib, Seaborn), VectorDB
- **Soft Skills:** Analytical Thinking, Communication (written & verbal), Collaboration, Interpersonal Skills, Customer Service Orientation, Adaptability

INTERNSHIP

Summer Research Intern May 2024 - July 2024
IIT Gandhinagar, Ahmedabad, India
Two Higgs Doublet Model Exploration

- Engineered and analyzed 25 datasets (500K rows each) for the Two-Higgs-Doublet Model (2HDM).
- Applied data balancing, feature engineering, and statistical techniques to handle high-dimensional, imbalanced datasets.
- Designed a neural network with regularization and dropout, achieving 15% higher accuracy in parameter constraint simulations.
- Delivered research reports with data visualizations and insights, strengthening domain expertise in data-driven research.

PROJECTS

1. Conversational ChatPDF Chatbot using LangChain & Groq LLMs

- Built a document-querying chatbot with memory using LangChain, Groq LLMs, ChromaDB: Implemented session-based memory, temporary file handling with reset functionality.

2.Covid Image Classification using Xception Model and Attention Mechanism

- Achieved an accuracy of 97.86% and precision of 96.82%, improving diagnostic performance.
- Implemented data augmentation and transfer learning to enhance model generalization.

3.Twitter Sentiment Analysis Project

- Built a sentiment analysis model using LSTM in Keras, achieving 80% accuracy on a dataset of 162,980 tweets.
- Implemented advanced text preprocessing techniques, including tokenization and feature extraction, reducing data imbalance by 30%.

Certifications

- Data Science and Machine Learning Certification - Edureka
- Generative AI (GenAI) Certification - Krish Naik (Udemy)
- Agile Virtual Experience Program - JPMorgan Chase & Co. (Team collaboration, Agile workflows, and stakeholder communication)

Achievements & Interests

- Enthusiastic about client-focused innovation and continuous learning
- Passionate about applying AI/ML in healthcare, manufacturing, and finance
