

ROHIT GUPTA

+91-9973556808 | rohit.gupta1604004@gmail.com | [LinkedIn](#)

SUMMARY

Computer Science graduate skilled in Machine Learning and Data Analytics, with experience building end-to-end data pipelines and customer segmentation models. Interested in AI systems and data-driven decision-making.

EDUCATION

1. B.Tech in Computer Science and Engineering (2022 - 2026)

Kalinga Institute of Industrial Technology, Bhubaneswar, Odisha, India

CGPA: 8.96

2. Class XII (2021) – St. Xavier Secondary School, Parsa, Nepal

GPA: 3.33

3. Class X (2019) – Maisthan Vidyapith Ma. Vi., Parsa, Nepal

GPA: 3.65

SKILLS

- **Languages:** Python, SQL, C++
- **Machine Learning:** TensorFlow, Keras, Scikit-learn, XGBoost
- **Data & Analytics:** Data Analysis, Statistical Analysis, Predictive Modeling
- **Techniques:** Classification, Regression, Clustering, NLP, Neural Networks
- **Data Processing:** Data Preprocessing, Feature Engineering
- **Visualization:** Matplotlib, Seaborn, Tableau
- **Tools & Others:** Git, LangChain, Vector Databases, Agile

INTERNSHIP

Software Engineering Intern

[Viasat India](#) | Feb 2026 - April 2026

- Built an end-to-end analytics pipeline to transform multi-source data into a unified customer dataset.
- Developed segmentation, scoring, and ranking models using feature engineering and normalized metrics.
- Delivered tableau dashboards and insights to support targeted business decisions and prioritization.

Summer Research Intern | May 2024 - July 2024

IIT Gandhinagar, Ahmedabad, India

Two Higgs Doublet Model Exploration [\[Github\]](#)

- Engineered and analyzed 25 datasets (500K rows each) for the Two-Higgs-Doublet Model (2HDM).
- Applied data balancing, feature engineering, and statistical techniques to handle high-dimensional, imbalanced datasets.
- Designed a neural network with regularization and dropout, achieving 15% higher accuracy in parameter constraint simulations.
- Delivered research reports with data visualizations and insights, strengthening domain expertise in data-driven research.

PROJECTS

1. Personalized AI Assistant (RAG-based Intelligent Agent) [\[Link\]](#)

- Built a RAG-based AI agent integrating multi-source personal data to deliver accurate, context-aware responses using embeddings, vector databases, and LLMs.

2. Twitter Sentiment Analysis Project

- Built a sentiment analysis model using LSTM in Keras, achieving 80% accuracy on a dataset of 162,980 tweets.
- Implemented advanced text preprocessing techniques, including tokenization and feature extraction, reducing data imbalance by 30%.

PUBLICATION

COVID Image Classification using Xception with Attention Mechanism

2nd International Conference on Circuits, Power, and Intelligent Systems (CCPIS), 2025 [\[IEEE\]](#)

- Achieved 97.86% accuracy and 96.82% precision on medical imaging dataset
- Applied transfer learning, attention mechanisms, and data augmentation to improve model performance

ACHIEVEMENTS & INTERESTS

- Completed Agile Virtual Experience Program (JPMorgan Chase & Co.), gaining exposure to team collaboration, agile workflows, and communication in a corporate setting.
- Passionate about applying AI/ML in healthcare, manufacturing, and finance.
